

DENTAL ASSISTANT ACADEMY OF CHICAGO

Illinois

2020 Allowable and Prohibited Duties for Dental Assistants

At-a-glance information includes a dental assisting career ladder and job titles, radiography requirements, education and exam requirements, delegable functions and supervision levels, and prohibited functions.

ABOUT THESE DATA

These data are presented for informational purposes only and are not intended as a legal opinion regarding dental practice in Illinois. The Dental Assisting National Board (DANB) and the Dental Assistant Academy of Chicago (DAAC) confers with the IL state board annually regarding the accuracy and currency of this information. To verify, or if you have any questions, please contact your state's dental board.

ILLINOIS: OVERVIEW

State-approved 5/26/2020

State Job Titles

State Career Ladder

There are three recognized levels of dental assistants in Illinois. See the following pages for details about requirements and allowed functions for each level.

1 Dental Assistant

2 Dental Assistant *qualified in expanded functions*

3 Expanded Function Dental Assistant (EFDA)

State Radiography Requirements

State Radiography Requirements

There are no radiography requirements for dental assistants in Illinois.

All dental assistants may legally operate dental x-ray equipment and perform dental radiographic procedures.

Prohibited Duties

Functions NOT Permitted by Dental Assistants in Illinois

The following functions are not permitted by any level of dental assistant:

- Diagnosis of or prescription for treatment of disease, pain, deformity, deficiency, injury or physical condition of the human teeth or jaws, or adjacent structures
- Removal of, restoration of or addition to the hard or soft tissues of the oral cavity except for the placing, carving, and finishing of amalgam restorations and placing, packing, and finishing composite restorations by dental assistants who have had additional formal education and certification as outlined in statute
- Any and all correction of malformation of teeth or of the jaws
- Administration of anesthetics except for monitoring of nitrous oxide, minimal sedation, moderate sedation, deep sedation and general anesthesia after completion of an approved training program
- The operative procedure of dental hygiene consisting of oral prophylactic procedures except for coronal polishing or pit and fissure sealants, as specified
- Making denture adjustments
- Permanently cementing permanent crowns or bridges
- Permanently re-cementing permanent crowns or bridges that have come loose
- Placement of any chemotherapeutic agent for the management of periodontal disease
- Cementing bands and/or bonding brackets
- Air polishing
- Inter-oral use of a high-speed hand piece
- Use of a laser to remove tissue
- Placement or removal of implant prosthetic components and prostheses, including but not limited to the placement or removal of healing abutments, implant supported provisionals, components used in final impression procedures, and final prostheses, which include abutment, crowns, fixed and fixed detachable prostheses and fixed detachable prostheses during recare appointments.

1 Dental Assistant

Requirements

Education, Training and Credential Requirements

A dental assistant in Illinois may perform basic supportive dental procedures specified by the state dental practice act (see below) under the supervision of a licensed dentist.

Allowable

Allowable Functions

Under Supervision*

- Any authorized or prescribed services or procedures for which the dental assistant is considered competent by the supervising dentist as a result of on-the-job training
- After being authorized by a dentist, remove loose, broken, or irritating orthodontic appliances on a patient of record for the purpose of eliminating pain or discomfort

In the state of Illinois, all dental assistants may:

- Expose, process and evaluate dental radiographs
- Perform infection control and occupational safety procedures
- Perform other duties not specified by this state's dental practice act

***Supervision:** A dentist must authorize the procedure, remain in the dental facility while the procedure is performed, and approve the work performed by the dental assistant before dismissal of the patient. The dentist does not need to be present at all times in the treatment room.

2 Dental Assistant qualified in expanded functions

Coronal Scaling and Intracoronal Temporization

Restorative (Amalgams, Composites and Interim Restorations)

Coronal Polishing, Sealants, Monitor Nitrous, Monitor Sedation

Education, Training and Credential Requirements

To perform expanded functions under the supervision of a licensed dentist in Illinois, a dental assistant must meet state requirements for each of the desired expanded functions, as outlined below.

To qualify to perform **coronal scaling** and **intracoronal temporization of a tooth**** under the direct supervision of a dentist, a dental assistant must:

- I. Have at least 2,000 hours of direct clinical patient care experience
- AND**
- II. Successfully complete an approved coronal polishing course prior to taking coronal scaling course
- AND**
- III. Successfully complete a structured training program in coronal scaling and intracoronal temporization of a tooth provided by an educational institution (such as a dental school or a dental hygiene or dental assisting program) or by a statewide dental or dental hygienist association approved by the Department, that includes:
 - minimum 16 hours of didactic and clinical manikin or human subject instruction covering specified content
 - an outcome assessment examination that demonstrates competency
 - completion of 6 full-mouth scaling procedures under the observation and with approval of the supervising dentist
 - issuance of a certificate of completion (which must be kept on file at the dental office)

To **place, carve and finish amalgam restorations; place, pack and finish composite restorations; and place interim restorations** under the direct supervision of a dentist, a dental assistant must:

- I. Pass approved coronal polishing course and approved dental sealants course (prior to taking restorative training program)
- AND**
- II. a. Successfully complete a structured training program meeting the requirements outlined in statute provided by an educational institution accredited by CODA **OR**
 - b. Have at least 4,000 hours of clinical patient care experience and successfully complete a structured training program meeting the requirements outlined in statute provided by a statewide dental association approved by the Illinois Department of Financial and Professional Regulation (IDFPR)
- AND**
- IV. Maintain on file at the dental office the certificate of completion of the required training program, which must be made available to IDFPR upon request

To perform **coronal polishing, place pit and fissure sealants, monitor patients under nitrous oxide, or monitor patients under sedation**, a dental assistant must:

- I. Be at least 18 years of age
- AND**
- II. a. Complete 1,000 hours of clinical dental assisting experience **OR**
 - b. Complete a CODA-accredited dental assisting program **OR**
 - c. Hold a current national DANB Certified Dental Assistant (CDA) certification
- AND**
- III. a. Complete approved course addressing the expanded function in question, subject to specific didactic and clinical requirements **OR**
 - b. Provide proof of completion of an approved dental assisting program that contained the expanded function in the curriculum

Note: For nitrous, sedation, and anesthesia monitoring, dental assistants must maintain basic life support certification intended for healthcare providers (BLS) that includes evaluation of hands-on skills and a written exam.

Requirements

Allowable Functions

Under Supervision**

- 20. Perform coronal scaling (using hand instruments) above the gum line, supragingivally, on the clinical crown of the tooth only on patients 12 years of age or younger who have an absence of periodontal disease and who are not medically compromised or individuals with special needs**
 - Perform intracoronal temporization of a tooth (using hand instruments)

Under Direct Supervision*

- 12, 51. Placing, carving, and finishing amalgam restorations
- 33. Place, pack, and finish composite restorations
- 50. Place interim restorations

Under Supervision**

- 9. Coronal polishing
- 40. Application of pit and fissure sealants
- 59. Monitor the patient while nitrous oxide is being administered
 - Monitor a patient under minimal sedation, moderate sedation, deep sedation or general anesthesia
 - All duties designated to Dental Assistants, under the same level of required supervision

Allowable

***Supervision:** A dentist must authorize the procedure, remain in the dental facility while the procedure is performed, and approve the work performed by the dental assistant before dismissal of the patient. The dentist does not need to be present at all times in the treatment room.

3 Expanded Function Dental Assistant

Requirements

Education, Training and Credential Requirements

To perform specified expanded functions in Illinois and hold oneself out as an Expanded Function Dental Assistant, a dental assistant must complete required training in each of the allowed expanded functions. To qualify, a dental assistant must:

- I. a. Complete training in the expanded functions from an approved continuing education sponsor **OR**
- b. Complete training in the expanded functions from a dental assistant training program accredited by the Commission on Dental Accreditation **OR**
- c. Complete a training course approved by the Illinois Department of Financial and Professional Regulation
- AND**
- II. Complete and maintain Basic Life Support certification, proof of which must be kept on file with the supervising dentist

Note: The Illinois General Assembly passed a law in the 2017 legislative session authorizing the creation of an Expanded Function Dental Assistant who may perform the functions listed below. The Illinois General Assembly further amended the law in 2018. The Illinois Department of Financial and Professional Regulation (IDFPR) is in the process of developing rules to implement this new law.

Allowable

Allowable Functions

Under Supervision*

- 9, 40. Coronal polish and pit and fissure sealants**
- 46. Take material or digital scans for final impressions‡
- 12, 33, 51. Place, carve, and finish amalgam restorations and place, carve, and finish composite restorations**
- 49. Perform pulp vitality test‡
- 59. Start the flow of oxygen and monitoring of nitrous oxide-oxygen analgesia‡

** As allowed pursuant to requirements summarized on the previous page

‡ After completing a training program that includes either didactic objectives or clinical skills and functions that demonstrate competency

***Supervision:** A dentist must authorize the procedure, remain in the dental facility while the procedure is performed, and approve the work performed by the dental assistant before dismissal of the patient. The dentist does not need to be present at all times in the treatment room.
